

Project Design Phase-II

Data Flow Diagram & User Stories

Date	
Team ID	SWTID-2026-2451
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a visual representation of the information flows within a system. For this project it shows how a ticket enters the school IT helpdesk, what changes it (automatic classification in Flow Designer), where it is stored (the Incident WorkFlow table), and where it leaves (email to the caller and tickets for IT agents).

Rounded box: external entity or process. Open box with D1: data store. Arrows show the data that moves between them.

Project Design Phase-II

Data Flow Diagram & User Stories

User Stories

The table below lists all the user stories for the Auto Ticket Classification product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Caller (student / teacher)	Ticket submission	USN-1	As a caller, I can create a ticket by entering my name and a short description of the issue.	Ticket is saved with an auto-generated INC number.	High	Sprint-1
		USN-2	As a caller, I do not have to choose a Category or Subcategory.	Both fields are filled in automatically after I submit.	High	Sprint-1
	Auto classification	USN-3	As a caller, my Wi-Fi or network issue is classified for me.	Category = Network, Subcategory = Wi-Fi.	High	Sprint-1
		USN-4	As a caller, my projector issue is classified for me.	Category = Hardware, Subcategory = Projector.	High	Sprint-1
		USN-5	As a caller, my password or login issue is classified for me.	Category = Access, Subcategory = Forgot Password.	Medium	Sprint-2
		USN-6	As a caller, my slow or hanging computer issue is classified for me.	Category = Performance, Subcategory = Slow Computer.	Medium	Sprint-2
	Email notification	USN-7	As a caller, I receive an email as soon as my ticket is created.	Email "Your Request for the issue has been submitted" reaches my email address.	High	Sprint-2
IT agent	Ticket handling	USN-8	As an IT agent, I see tickets that are already categorized, and I can set the assigned group, assignee, and state.	Category and Subcategory are filled in when I open the ticket.	Medium	Sprint-3
Administrator	Deployment	USN-9	As an administrator, I can export the project as an update set to share or deploy it.	Update set is marked Complete and an XML file downloads.	Low	Sprint-3
