Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics who are they?	Describe the customer and their attributes here
I'm trying to	List their customer or "job" the user wants - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what makes it hard?	Describe the problems or barriers that get in the way here
because	Explain the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it affect them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	but it takes a long time	because this website is not responsive and doesn't have a mobile version	which makes me feel Frustrated
---------------------------	--	------------------------------------	--	--

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student or teacher who raises IT support requests	Report an IT issue (Wi-Fi, projector, password, slow computer) and get it resolved fast	My ticket waits for IT staff to review it and assign a category	Every request is categorized manually, which is slow and does not scale	Frustrated and unsure my issue was noticed
PS-2	An IT helpdesk agent	Route and resolve tickets efficiently	I must read each ticket and set its category and subcategory by hand	Tickets are not classified automatically, so the process is slow and error-prone	Overloaded and under pressure
