

Project Development Phase

Performance Test

Date	
Team ID	SWTID-2026-2451
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	• Ticket records stored in the custom table Incident Workflow (u_incident_workflow) • 9 fields rendered on the form: Number, Caller, Category, Subcategory, Short Description, Description, State, Assigned Group, Assigned to • Test tickets INC00511 (Wi-Fi) and INC00512 (Projector) displayed with Category and Subcategory auto-filled
2.	Data Preprocessing	• Auto-numbering enabled (Prefix INC, 5 digits) so every ticket gets a unique number • Choice lists defined for Category, Subcategory and State • Subcategory made dependent on Category for consistent data • Keyword-based classification of Short Description by Flow Designer
3.	Utilization of Filters	• Trigger condition: Category is empty • If / Else If conditions: Short Description contains Wi-Fi or Network, Projector, Forgot password, Slow computer • Emails log filtered by Subject contains "your" to verify notifications
4.	Calculation fields Used	• Category and Subcategory set automatically by the Update Record action • Ticket Number generated by auto-number • Email recipient taken from Caller → Email
5.	Dashboard design	No of Visualizations / Graphs - 0 • Flow design: 1 trigger, 4 classification conditions (If / Else If), 4 Update Record actions and 1 Send Email action
6	Story Design	No of Visualizations / Graphs - 0 • 2 test scenarios executed (WiFi not working in library, Projector not turning on); both classified correctly and email sent to caller
