Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: Automates school IT ticket classification in ServiceNow Flow Designer by assigning Category and Subcategory from keywords and emailing the caller.

Project Version:

Testing Period:

Testing Scope:

Features and functionalities: Incident WorkFlow custom table and fields; dependent Category and Subcategory choices; keyword-based auto classification (Wi-Fi / Network, Projector, Forgot password, Slow computer); automatic email notification to the caller; Update Set export.

Requirements: Classify tickets automatically from the issue description; assign Category and Subcategory without manual intervention; support dependent choice logic; send an email on ticket creation; store ticket data in a standard format.

Testing Environment:

URL/Location: ServiceNow instance – Incident WorkFlow table (u_incident_workflow) and Workflow Studio (Flow Designer)

Credentials (if required): Admin user account of the ServiceNow instance

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Network issue is auto classified (INC00511)	1. Open a new Incident WorkFlow record 2. Select Caller and enter Short description: My college has issue with Network 3. Submit and reload the form	Category = Network, Subcategory = Wi-Fi	Category = Network, Subcategory = Wi-Fi	Pass
TC-002	Projector issue is auto classified (INC00512)	1. Open a new Incident WorkFlow record 2. Select Caller and enter Short description: Projector not turning on 3. Submit and reload the form	Category = Hardware, Subcategory = Projector	Category = Hardware, Subcategory = Projector	Pass
TC-003	Confirmation email is sent to the caller	1. Create a ticket 2. Open System Logs > Emails 3. Search Subject: Your Request for the issue has been submitted	Email is created for the caller's email id	Email record found and previewed	Pass

TC-004	Subcategory depends on Category	1. Open a new record 2. Select a Category 3. Open the Subcategory list	Only the matching Subcategory is listed (e.g. Network → Wi-Fi)	Only the matching Subcategory is listed	Pass
TC-005	Auto-number is generated without duplication	1. Create two tickets 2. Compare the Number field	Unique INC number for each ticket	Unique numbers generated (INC00511, INC00512)	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Short description with "WiFi" (no hyphen) is not classified	1. Create a ticket with Short description: WiFi not working in library 2. Submit and reload	Medium	Open	Flow checks only Wi-Fi and Network; add WiFi as a keyword
BG-002	Login and Hanging keywords are not handled	1. Create a ticket with Short description: Login not working 2. Submit and reload	Medium	Open	Flow checks only Forgot password and Slow computer
BG-003	Subcategory typed as "Slow Compter" in the field table	1. Open the Subcategory choices 2. Check the Slow computer label	Low	Closed	Choice label is Slow Computer

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
